

Levitating globe

Product information

Magnetic levitating globe antique design

- levitates in a magnetic field
- globe diameter 15 cm (6")
- approx. scale 1 : 85 million
- total height 27,5 cm (10,8")
- 1048 geographical names

The 16.000 control processes per second in the installed computer control with intelligent software ensure a stable, freely floating globe.

An additional permanent magnet in the base holds the globe securely to the frame when the floating mechanism is switched off.
