

World Time Globe

Product information

World Time Globe

with electronic information system

For 5,000 stored locations, you can find out:

- The current local time
- The current population
- Location within the grid square
- Location in terms of longitude and latitude
- Distance between locations in km
- Places of interest
- Which country the location is in

For every country in the world, you can find out:

- Location and capital city
- Population and area
- Population density
- Official language
- Form of government and currency
- Average temperature
- and much more

Entering search terms is quick and easy thanks to the electronic spell-checker.
